

Let's get started

Engaging, whiteboard-style animated videos with linked assessment items, performance reports and more that support teaching and learning.

The collage features several Osmosis interface components:

- Video Player:** A video titled "Approach to chest pain: Clinical sciences" with a view count of 6,618. The video content includes a red warning icon for "UNSTABLE PATIENT" and a list of causes for chest pain: STEMI, CARDIAC TAMPOADE, AORTIC DISSECTION, PULMONARY EMBOLISM, and TENSION PNEUMOTHORAX.
- Notes:** A "Notes" window showing a "BLOOD COMPONENTS FUNCTION" section with a table of components and their functions.
- Quiz Builder:** A "Quiz Builder" window showing a list of foundational questions and a "Quiz Summary" section with 442 total questions.
- Diagram:** A diagram titled "ACUTE CHOLECYSTITIS" showing the pathophysiology: "INFLAMMATION of the GALLBLADDER" leads to "IMPAIRED OUTFLOW OF BILE", which causes "PRESSURE within GALLBLADDER". This leads to "COMPLICATIONS" including "INFLAMMATION", "INFECTION", "GANGRENE", and "PERFORATION". The diagram also distinguishes between "CALCULOUS CHOLECYSTITIS" (with a stone) and "ACALCULOUS CHOLECYSTITIS" (without a stone).
